

What is it?

The Asphalt Paving Fundamentals Workshop is a one day course taught by a nationally recognized industry expert that covers all aspects of the delivery, placement, and compaction of asphalt pavement.

What is the objective?

To help attendees implement best practices when hauling, placing, and compacting asphalt pavements to deliver a quality asphalt pavement. The workshop will cover topics essential for new and experienced paving crew members, foremen, superintendents, and inspectors.

Who should attend?

- Paving crew members, foreman, and superintendents.
- Public agency and private inspectors.
- Owners, managers and owner representatives who want a better understanding of quality paving practices.

What will be covered?

Surface preparation, loading and delivery of asphalt, paver set up and operation, achieving proper compaction, proper joint construction, avoiding segregation, and others.
